SKILLS

🗣 Languages

Spanish Native language
English C2, Full professional proficiency
French C1, Fluent

</> Programming Languages

Python ●●●●●●●●
Bitcoin Script ●●●●●●●●
Javascript ●●●●●●●●
Solidity ●●●●●●●●
Rust | Swift | C | Bash | SQL | React

🔧 Software Tools & Libraries Experience

Bitcoin & Lightning

BitcoinDevelopmentKit, python-bitcoinrpc,
BitcoinJS, IbexHUB API.

Node Management

MyNode/RaspiBlitz, LNBits, RTL, Voltage.

Electronics

Raspberry Pi, Arduino, Texas instrument
Launchpad MSP430, 3D printing.

Ethereum & Polygon

Python Brownie Framework, Ganache,
Remix, OpenZeppelin, Web3JS, Infura.

Web Backend

Django, Flask, NodeJS, MySQL, Post-
greSQL.

Data Analysis and Visualization (Python)

Numpy, Pandas, SciPy, StatsModels, Mat-
plotlib, Seaborn.

Machine Learning, AI & Data extranction

OpenCV, Keras, TensorFlow, SciKit-Learn,
Tesseract OCR Engine, Scrapy Web.

CI/CD

Docker and Docker Compose, AWS,
Jenkins.

✖️ Highly proficient in mathematics

Probability and Statistics ●●●●●●●●
Advanced Calculus ●●●●●●●●
- Differential, Integral, Vector & Complex
Linear Algebra ●●●●●●●●
Differential Equations ●●●●●●●●
Numerical Simulations ●●●●●●●●

₿ BITCOIN & PERSONAL PROJECTS

🔗 - **Bitcoin-Lightning IOS Wallet:** Developed a prototype for a **non-custodial**, descriptor-based IOS Bitcoin wallet, implementing the **BitcoinDevelopmentKit**, connecting to my own **Electrum server** for Blockchain data and successful transaction broadcast on mainnet. Also added **Lightning Payments** functionality through the **IBEXHub API Service**. **Take a look.**

🔗 - **Chaotic Attraction:** Developed a 3D interactive experience to touch and play with the **Butterfly Effect**. The numerical simulation runs in the browser, solving a Lorentz System of differential equations to get the next step for each particle. Every time you see it, the simulation is completely unique. Deployed on IPFS. **Take a look.**

⚙ EXPERIENCE

📅 02/2022 - Present

📍 CryptoMX, Tijuana, México

Blockchain Consultant (Remote)

- Assisted on the creation of online educational content and courses about **Bitcoin**, Ethereum Smart-Contracts and NFTs by **communicating technical information, at different levels of complexity**, e.g., Elliptic curve cryptography, Hashing algorithms, Proof of Work vs Proof of Stake consensus and smart-contract interactions.
- Developed Solidity smart-contracts for **ERC-721 NFTs** and Royalties Splitters, tested and deployed on **Ethereum and Polygon networks** with the **Python Brownie Framework**.

📅 08/2021 - Present

📍 MedTrainer, Queretaro, México

Senior Platform Engineer (Remote)

- Lead the newly established **Python Automation Team** from initial proposal and architecture design to the final delivery of an **Automation Microservices Platform** for on-demand **data retrieval and web scraping** of several US-States medical professional licensing websites.
- Maintained **constant communication and collaboration** with the company CTO, DevOps and frontend departments about the projects design and implementation.
- Transformed each data validation task **from 1 employee-hour to 1 automated-minute**.
- Established standards for good practices in **python microservices** and **test-driven development** as well as standards for **Detailed Documentation and Templates** for future projects.

📅 02/2021 - 08/2021

📍 Arkus Nexus, Tijuana, México

Machine Learning Engineer (Remote)

- Developed **Machine learning** models for patter recognition and text extraction from images implementing Keras, OpenCV and Tesseract OCR Engine. This models were served through a **Flask API** and triggered as **Celery asynchronous tasks** on **AWS** with a **RabbitMQ message broker**.
- Supported other **Django** and **Flask** web projects within the company.

📅 01/2019 - 02/2021

📍 Grupo Molecular, Tijuana, México

Lead Developer and Researcher

- Lead a team of developers on the design and delivery of a **Financial Analysis Web Platform** that fetched and analyzed real-time data from various APIs implementing **Django REST Framework**, PostgreSQL database, **Celery asynchronous tasks** on the backend and **NodeJS+ReactJS** on the frontend.
- Developed **Machine learning** models for **time-series forecasting** and **pattern recognition** implementing Long-Short Term Memory Models and Convolutional Neural Networks.
- Delivered statistical **data analysis and visualization** of experimental results in different research projects with **Python** tools.

🎓 EDUCATION

📅 2014 - 2019

📍 Universidad Autónoma de Baja California,
Science Faculty, Ensenada, México.

Degree in Physics

📅 2017 - 2018

📍 Université Claude Bernard Lyon 1,
Faculté des Sciences et Technologies, Lyon, France.

Academic Exchange
